WORK EXPERIENCE

Data Scientist

March 2026 – Present

EY Greece

- Engineered agentic AI applications with Microsoft Agentic Framework for a major banking client to automate complex workflows.
- Optimized project development procedures, boosting overall team efficiency by 20%.
- Translated business requirements into technical specifications, while refining agentic workflows to maximize system performance.
- Reviewed and evaluated project deliverables, ensuring high quality and adherence to planned schedules

Delivery QA Engineer

October 2024 – March 2026

Omilia Ltd.

- Authored and executed multiple test cases for new software features, leading to a 25% reduction in post-release bugs.
- Spearheaded a testing framework to utilize MCP for a new project.
- Implemented a better way to manage version control in git.
- Reduced workflow issues to boost time management.
- Collaborated with a 6-person agile team to develop new methodologies and frameworks with AI tools.
- Designed CI/CD pipelines and bash scripts to increase efficiency by up to 30%.
- Handled development of Python scripts to optimize automation of testing processes and saving up to 2 hours daily.

Information Technology Support Technician

December 2022 – July 2023

New York College

- Technical support for online classes and platforms, refined support for students and teachers regarding the college's e-learning site.
- Communicated with management to set up computers used on campus
- Assess and troubleshoot computer problems brought by students, faculty and staff

PROFILE

A Data Scientist MSc candidate, with nearly two years of experience in bridging Software Engineering and Data Analytics. He specializes in identifying workflow inefficiencies and building automated solutions. In the past, he engineered frameworks utilizing tools like Playwright that saved teams hours of manual work daily, and he is currently focused on leveraging predictive modeling and AI to drive business value. He is currently wrapping up his Master's in Data Analytics and Technologies soon and is passionate about helping organizations innovate by turning complex data into reliable software.

EDUCATION

University of Greater Manchester

United Kingdom

MSc Data Analytics and Technologies with attendance at New York College, Athens

Nov. 2025 – Jan 2027

University of Greater Manchester

United Kingdom

BSc (Hons) Computing (Data Analyst) with attendance at New York College, Athens

Oct. 2022 – May 2025

Participation in the validation process of the new MSc in Big Data and New Technologies of the University of Greater Manchester and New York College.

SKILLS

Programming Languages: Python, SQL, Java, C#, C++

Databases: MySQL, PostgreSQL, MongoDB, Neo4j, NoSQL, GraphQL

Data & ML: Web Scraping, Sentiment Analysis, Pandas, NumPy, PyTorch, Matplotlib

Methodologies: Agile, Scrum, Design Patterns, CI/CD, CRISP-DM, KDD, SEMMA

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, PyCharm, IntelliJ, Postman

Soft Skills: Attention to detail, Communication, Teamwork, Problem Solving, Presentation skills, Critical thinking, Adaptability, Time management

Languages: English (Certificate of Proficiency in English), French (B2, medium), Native Language: Greek
